

DEPARTMENT OF
INDUSTRIAL & SYSTEMS ENGINEERING
(213) 743-2705

May 1, 1986

To Whom It May Concern:

I am writing this note of recommendation in support of Mr. Bahman Pouranpir, who may be under your consideration for possible employment as an industrial engineer.

I have known Bahman since June 1983 when I first joined the USC Faculty. Later in 1985 he took my computer simulation course. He demonstrated a remarkable performance in that highly analytical and computer programming intensive course. His interest and dedication in that class was such that I made him my teaching assistant for the course in the following semester.

Through my interactions with Bahman as my assistant I learned about his sense of loyalty and responsibility. He was always prompt in delivering the assigned duties, and I rarely detected quality problems in his work. My students were most pleased with Bahman's conduct. He was said to be very helpful and conscientious in dealing with the students' problems.

As for technical abilities, I believe Bahman is best suited for the operations management related areas of industrial engineering. He is very interested and knowledgeable in issues such as Materials Requirements Planning and Just-in-Time production strategies. He is very pragmatic and is anxious to apply his theoretical knowledge in a real life setting. He is a clear thinker and has a special ability in problem simplification and analysis.

I would like to stress upon the point that the most prominent factor about Bahman is his pleasant personality. He is very trustworthy and loyal. Based on these facts I have no reservation in strongly recommending Mr. Pouranpir for the position. He will be a valuable asset to his employing organization.

Sincerely yours,

B. Khoshnevis
